

Brains Change Throughout life!

The brain is a dynamic entity and through careful, systematic remediation, we can help it develop more normally.

RDI Family Consultation Program: This comprehensive program restores the natural Guided Participation Relationship to families where it has been disrupted or has never formed. This is for families who have a child with an Autism Spectrum Disorder, or other challenges: *Reactive Attachment Disorder, ADHD, Tourette Syndrome, abuse/neglect, and others.*

Certified Consultants work with families in a personalized manner to identify and help reduce obstacles to relationship development. They also work to empower family relationships so parents can act as the primary guides of their children's mental, social and emotional development.

RDI Learning Community: A vital component of RDI programs is our unique worldwide, online learning community, which fosters relationships of parents and professionals, dedicated to furthering a common mission.

Professional Certification: Our certification program equips and trains professionals from a variety of fields to work with families. We offer trainings several times a year and professional supervision to ensure a quality educational experience.

"For the first time ever I feel like we have a "normal" family." – Vicki

RDI Changes Lives

"The skills our son has learned in his RDI course have been fundamental to his transition from a disconnected, anti-social 4 year old prone to meltdowns and difficult to manage to someone who takes part in all normal activities without special treatment or supervision. He is popular at school (albeit with a quirky sense of humor) and while we are still working on some behaviors, he doesn't obviously stand out from the crowd of kids around him" - Steve W.

"We have moved from despair to realistic hope about our child's future. RDI has reduced our stress levels and we are moving to a normal family life without autism taking over. We have a long way to go but, we have full faith in ourselves and in RDI! - RDI Mom

"After two years of working with our consultant, I can't even begin to tell you how good it feels to be a competent parent; to no longer feel like I'm failing my child. He exceeded what our hopes were; partly because we were scared to hope. Now our hopes are greater. He is far more capable of having a good quality of life than we ever knew. We are far more capable of helping him get there than we ever knew, and are looking forward to the journey" - Michelle D.

"We have been doing RDI for about three years now and it has completely transformed our son from a non-interactive, non-verbal toddler to an extremely interactive preschooler who shares his day with me in complete thoughts and sentences, makes friends, and excels in a typical preschool with no outside assistance. - Kelli W.

"I know with complete certainty that I would not be where I am in my relationship (true, connected intimacy) with my sons without RDI and my consultant." - Barbara H.
